of **Arboriculture**

PRODUCT CATALOG

JANUARY - JUNE, 2020

Whether you are studying for ISA credentials, seeking CEUs, or building your arboricultural knowledge, ISA is your source for professional books, digital publications, DVDs, podcasts, vidcasts, and online courses.

ISA Credentials 4–15

- Certified Arborist
- Board Certified Master Arborist
- Utility Specialist
- Tree Risk Assessment
- Certified Tree Worker
- Municipal Specialist
- CEU Opportunities

eLearning 16–17

- Podcasts and Vidcasts
- Online Learning Center

Area of Practice 18–28

- Tree Risk Assessment
- Pruning
- Utility Arboriculture
- Tree Biology
- Planting and Establishment
- Root Systems, Soils and Tree Health
- Safe Work Practices
- Identification and Selection
- Urban Forestry
- Diagnosis and Disorders
- Arboriculture References
- Consulting and Legal Issues

Recursos en Español 29–31

Standards and Best Practices 32–36

- Best Management Practices (BMP)
- ANSI A300 Standards
- A300/BMP Combos
- Z133 Safety Standard

Public Education 37–40

**Any educational or preparatory material, whether published by ISA or not, should NOT be considered the sole source of information for the certification examination. These resources and the ISA certification program exams are developed through separate processes and entities.*

Please recycle this catalog when you are finished with it.

Through research, technology, and education, the International Society of Arboriculture (ISA) promotes the professional practice of arboriculture and fosters a greater worldwide awareness of the benefits of trees.

The ISA story is illustrated by the resources we provide to support arborists and the trees they care for. We encourage you to explore our educational products and services to learn how ISA can help you in your career development.

ISA Certified Arborist®

Three steps to become an ISA Certified Arborist

Step 1: Fulfill one of the following three eligibility options:

- 3 years experience in tree care, OR
- 2-year degree in arboriculture + 2 years experience, OR
- 4-year degree in a related field + 1 year experience

Step 2: Review the application handbook and send us your application.

Step 3: Take and pass the ISA Certified Arborist exam at an ISA Component event or Pearson VUE computer-based-testing center.

Please see application handbook for more details!

www.isa-arbor.com/credentials

Already an ISA Certified Arborist?
Maintain your credential by:

- Meeting the continuing education requirements (for ISA Certified Arborists that is 30 CEUs every 3 years); AND
- Paying recertification fees

Any educational or preparatory material, whether published by ISA or not, should NOT be considered the sole source of information for the certification examination. These resources and the ISA certification program exams are developed through separate processes and entities.

Helmet Decal

Designed for credential holders to display on their helmet, this set of four, 1 x 2-inch (approx. 2.5 x 5 cm), adhesive decals displays the logo in four-color format.

CA1003

Helmet Decal 4 for \$5.00

Patches

Available in sets of four, these laser-stitched, four-color patches for credential holders can be sewn on shirts, jackets, or uniforms. Size is 2¼ x 4 inches (approx. 5.7 x 10 cm).

CA1011

Patch 4 for \$10.00

Certified Arborist Vehicle Decals (set of 2)

These 8 x 15-inch (approx. 20 x 38 cm) vinyl ISA Certification logos for your vehicle include customization underneath the logo with your certification ID and name. Provide your name and certification ID(s) for customization.

CA1019

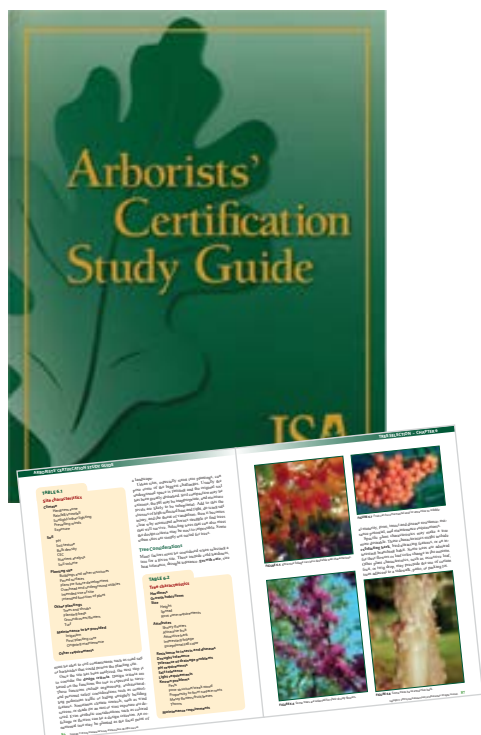

Color Vinyl — \$45.00

Please allow at least 4–6 weeks for delivery of customized items.

To purchase these products and use this logo you must have passed the ISA Certified Arborist® exam.

You must maintain your certification status or discontinue use of these products and logo when your credential expires.

Arborists' Certification Study Guide (Third Edition)

This complete study resource is designed to help you prepare for the ISA Certified Arborist® exam. A must-have for exam preparation, it also provides a strong foundation and reference for all tree care professionals. (©2010, softcover, 352 pp., 325 full-color images)

Guide for Plant Appraisal (10th Edition, Second Printing)

The Guide for Plant Appraisal, 10th Edition is the most informative and comprehensive alignment of current knowledge of the approaches, processes, and methods of plant valuation. This edition represents a systematic evolution of plant appraisal that integrates new research into a deeper understanding of the strengths and weaknesses of the available methods. Included in this edition are detailed discussions of newly streamlined core concepts and terminology, a review of the organization and context of appraisal reports, and an updated emphasis on appraiser awareness of the environmental and ecological benefits plants provide. Also new to this edition are appendices and a glossary. (©2018, softcover, 170 pp.)

Managing Insects and Mites on Woody Plants: an IPM Approach (Third Edition)

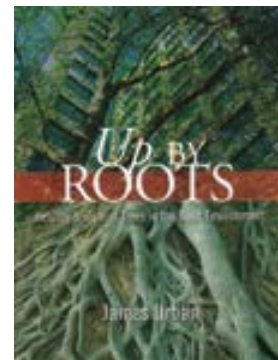

—John A. Davidson and
Michael J. Raupp

Identify and research more than 145 pests with this new edition of an excellent resource. Color images, concise life history descriptions, and integrated pest management (IPM) control suggestions for insect and mite pests on 50 kinds of trees and shrubs commonly grown in the mid-Atlantic region of the United States. Includes an in-depth pest identification, monitoring, and control section. Specifically for use by the commercial tree care and landscape maintenance industries. (©2014, spiralbound, 131 pp.)

Best Management Practices: Utility Tree Risk Assessment

Improve your risk assessment skills. Accurately and consistently assess tree-related risk to overhead electric utility infrastructure. An excellent resource for:

- Utility personnel
- Utility vegetation managers
- Utility tree risk assessors
- Line clearance contractors

Visit isa-arbor.com/store for more information and to purchase when available.

Utility Arboriculture: The Utility Specialist Certification Study Guide —Randall H. Miller and Geoffrey P. Kempter

This expanded edition of the study guide for ISA's Certified Arborist Utility Specialist certification exam preparation is an excellent resource for all professionals in the field of utility arboriculture.

Utility Arboriculture: The Utility Specialist Certification Study Guide is based on scientific research and proven best practices. This book provides utility arborists and foresters with the information necessary to navigate the complexities of today's vegetation management industry.

It covers the latest methods and techniques in the areas of safety, program and personnel management, utility pruning, integrated vegetation management, electrical knowledge, storm preparation and response, and communications. (©2018, softcover, 276 pp., full-color illustrations and photos, glossary, index)

Tree Risk Assessment Qualification (TRAQ)

TRAQ objectives

ISA offers the Tree Risk Assessment Qualification (TRAQ) as an instructor-led credential that demonstrates professional knowledge in tree risk assessment through participation in a training course and passing its accompanying exam. The TRAQ program offers tree care professionals the opportunity to expand their knowledge of the fundamentals of tree risk assessment by learning a standardized, systematic process for assessing tree risk and providing information to tree owners and risk managers for making informed decisions that will promote the safety of people and property and enhance tree benefits, health, and longevity. Through education and training, arborists will learn strategies to systematically identify and assess tree risk.

The qualified professional is:

- Proficient in the fundamentals of limited-visual and basic tree risk assessment, as defined in ISA's Best Management Practices: Tree Risk Assessment;
- Knowledgeable about the principles of advanced diagnostic techniques for assessing tree risk;
- Able to gather and synthesize information needed to assess tree risk; and make reasoned judgments and recommendations for mitigating identified risk.

To learn more about this credential and for specific eligibility requirements, please see application handbook at www.isa-arbor.com/credentials

Basic Tree Risk Assessment Form Pad

Now made of waterproof "Rite in the Rain" paper, this convenient waterproof 25-page pad of Basic Tree Risk Assessment forms will keep your assessment notes organized for you and your clients.

ISA Certified Tree Worker®

Three steps to become an ISA Certified Tree Worker

Step 1: Fulfill the following eligibility requirements according to the desired specialty:

Climber Specialist

Must have 18 months of documented or verifiable climbing experience.

Aerial Lift Specialist

Must have 18 months of documented or verifiable experience in arboriculture with at least 6 of those 18 months in the operation of an aerial lift device.

Both specialties need

Valid proof of CPR, first aid, and aerial rescue training.

Step 2: Review the application handbook and send us your application.

Step 3: Take and pass the ISA Certified Tree Worker exam at an ISA Component event or Pearson VUE computer-based-testing center; AND a skills exam for the desired specialty at a scheduled ISA Component event.

Please see application handbook for more details!

www.isa-arbor.com/credentials

Already an ISA Certified Tree Worker? Maintain your credential by:

- Meeting the continuing education requirements for 15 CEUs and showing valid proof of aerial rescue, CPR, first aid every 3 years; AND
- Paying recertification fees

Any educational or preparatory material, whether published by ISA or not, should NOT be considered the sole source of information for the certification examination. These resources and the ISA certification program exams are developed through separate processes and entities.

Introduction to Arboriculture Online Training Series

Purchase the award-winning Introduction to Arboriculture Training Series as a package and receive 25 great online courses to develop your expertise in arboriculture and save more than \$200!

Advance your knowledge of tree care, or prepare for the ISA Certified Arborist® or other ISA credential exams while enjoying an interactive, visual learning experience with instant feedback.

Titles included in this series:

- Tree Biology
- Tree Worker Safety
- Pruning
- Tree Identification & Selection
- Diagnosis & Disorders
- Planting & Early Care
- Tree Maintenance
- Plant Health Care
- Soil & Water
- Risk Assessment & Tree Protection

Non-member: \$470.95 **Member: \$395.95**

Update: ISA is no longer selling CD-ROMs due to increased user issues with the technology. We are only selling the online version.

ArborPod™

Our ArborPod vidcasts and podcasts and other online educational materials showcase arboricultural techniques, research, and information, providing you with access to the industry expertise on a wide range of topics.

- **Free:** Listen/watch to any podcast at any time.
- **On demand:** Subscribe to our feed to receive a new podcast episode or educational opportunity every week throughout the year.
- **Current:** Learn from industry experts at the forefront of the arboriculture field.
- **Diverse:** Pick from hundreds of materials that will help enhance your knowledge and skills.

After watching and listening to our vidcasts and podcasts, go to the ISA webstore to purchase quizzes and earn CEUs.

Best Practices

See an arborist demonstrate fundamental practices and procedures written about in ISA's series of Best Management Practices booklets. Subscribe to this vidcast to learn about new topics or to freshen up on work you've been doing for years.

Detective Dendro®

Join diagnostic sleuth Detective Dendro® and his team of original characters on adventurous expeditions to investigate tree disorders. This popular series will spark your interest and help you learn valuable diagnostic tips.

Climbing and Rigging

Learn about equipment, resources, and techniques used in a variety of climbing and rigging scenarios. Download these vidcasts to your mobile device for quick reference before practicing these techniques in the field.

Science of Arboriculture

Stay up to date on the latest research-based arboriculture information from across the industry, presented by the industry's top educators, researchers, and practitioners at the ISA Annual Conference.

Arborist News Audio

Listen to the most current CEU article from Arborist News magazine, narrated for your convenience. While the magazine is only available to ISA members, this podcast is available to all arborists.

isa-arbor.com/Online-Learning/Podcasts

Read Recent Articles and Take Quizzes for CEUs!

Arboriculture & Urban Forestry

Read an article featured in the most recent issue of ISA's scientific journal, Arboriculture & Urban Forestry, to learn about the topic and stay current with new research. Then go to the ISA webstore to take the CEU quiz.

Tree Risk Assessment

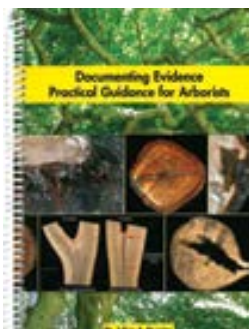

Tree Risk Assessment Manual (Second Edition)

—Julian A. Dunster (principal author),
E. Thomas Smiley, Nelda Matheny, and Sharon Lilly (contributing authors)

A valuable tool for both the expert and novice risk assessor, this companion publication for the Tree Risk Assessment Qualification (TRAQ) course will quickly become one of the most referenced resources on your bookshelf. Learn the critical steps in the risk assessment process—from site assessment to risk evaluation and communicating risk to clients (and everything in between). (©2017, softcover, 194 pp., 150 full-color illustrations and photos)

Documenting Evidence: Practical Guidance for Arborists

—Julian A. Dunster

This succinctly written guide explains how to document, record, interpret, and explain evidence that arborists encounter in their day-to-day work. With examples and case studies based on arboriculture and forestry, key ideas are clearly illustrated with plenty of photographs and graphics. (©2014, softcover, spiralbound, 54 pp.)

Pruning

Structural Pruning: A Guide for the Green Industry

—Edward F. Gilman, Brian Kempf, Nelda Matheny, and Jim Clark

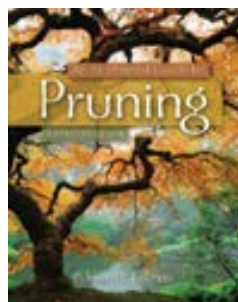

This well-illustrated book describes an approach to pruning that reduces risk by promoting a sound tree structure that resists failure, provides clearance, and improves aesthetics. It will help tree professionals build on their knowledge and application of current industry pruning standards. (©2013, softcover, 83 pp., color photographs)

Utility Arboriculture

Utility Arboriculture: The Utility Specialist Certification Study Guide (Third Edition)

—Randall H. Miller and Geoffrey P. Kempter

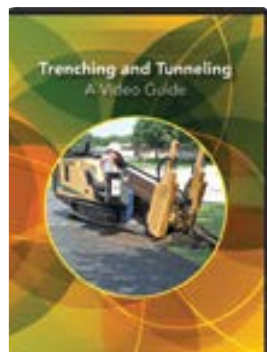

This expanded edition of the study guide for ISA's Certified Arborist Utility Specialist certification exam preparation is an excellent resource for all professionals in the field of utility arboriculture.

Utility Arboriculture: The Utility Specialist Certification Study Guide is based on scientific research and proven best practices. This book provides utility arborists and foresters with the information necessary to navigate the complexities of today's vegetation management industry.

It covers the latest methods and techniques in the areas of safety, program and personnel management, utility pruning, integrated vegetation management, electrical knowledge, storm preparation and response, and communications. (©2018, softcover, 276 pp., full-color illustrations and photos, glossary, index)

Recursos en Español

ANSI Z133 Requisitos de seguridad para operaciones de arboricultura (ANSI Z133 Safety Requirements for Arboricultural Operations)

El estándar fue desarrollado para la industria de la arboricultura bajo los procedimientos del Instituto Nacional Estadounidense de Estándares. La revisión del 2017 brinda los criterios actuales en los Estados Unidos para los arboristas y los otros trabajadores involucrados en operaciones de arboricultura:

- Requisitos generales de seguridad
- Peligros eléctricos
- Uso seguro de vehículos, dispositivos móviles y equipos remolcados
- Herramientas eléctricas manuales portátiles
- Herramientas manuales y escaleras
- Trepa de árboles
- Procedimientos de trepa

Esta publicación es una referencia esencial para las autoridades federales, estatales y municipales que redactan regulaciones sobre operaciones en arboricultura. Para información adicional, visita www.isa-arbor.com/z133. (@2018, cubierta rústica, diez anexos, índice, 74 páginas).

Mejores prácticas de manejo: Poda de árboles (BMP Tree Pruning)

Es idéntica en contenido a la versión en inglés y provee estrategias para cumplir con los estándares de la industria y las expectativas del cliente, causando el mínimo de daño al árbol. (©2008, cubierta rústica, 42 páginas)

P1314S

No es miembro: \$11.95 **Miembro: \$9.95**

Mejores prácticas de manejo: Poda de árboles que interfieren con servicios públicos (BMP Utility Pruning of Trees)

Llena de ilustraciones, explica las secciones del árbol que tienen mayor potencial de ocupar el espacio de las líneas eléctricas y otros servicios y utilidades públicas. Con información idéntica a la versión en inglés, la guía se centra en los métodos de poda que promueven la seguridad y dependencia fiable de los servicios públicos a la vez que minimiza el impacto en los árboles. (©2006, cubierta rústica, 26 páginas)

P1316S

No es miembro: \$11.95 **Miembro: \$9.95**

Mejores prácticas de manejo: Plantación de árboles (BMP Tree Planting)

Contiene información importante e ilustrada con dibujos y tablas. Explica la preparación adecuada del cepellón y el hoyo de plantación, el mejor proceso de plantación, y la poda y el mantenimiento subsecuentes. (©2014, cubierta rústica, 47 páginas)

P1317S

No es miembro: \$11.95 **Miembro: \$9.95**

Mejores prácticas de manejo: Manejo Integrado de la Vegetación (BMP Integrated Vegetation Management)

Sirve de ayuda en la selección y aplicación de métodos y técnicas para el control de la vegetación en proyectos eléctricos en los derechos de paso y derechos de vía del gasoducto. (©2014, cubierta rústica, 52 páginas)

P1319S

No es miembro: \$11.95 **Miembro: \$9.95**

Cada una de estas guías acompañan a sus correspondientes estándares ANSI A300 (A300 disponibles solamente en inglés)

Best Management Practices (BMP)

The Best Management Practices (BMP) series is designed to interpret tree care standards and provide guidelines of practice for arborists, tree workers, and the people who employ their services.

Tree Planting

The active process of tree planting, including site and species selection, planting practices, post-planting pruning, and early tree care. (©2014, 40 pp.)

ANSI A300 Standards and BMP Combos

ANSI A300 Standards for Tree Care Operations

The ANSI standards represent the industry criteria for performing tree care operations. They can be used for general familiarity with professional requirements, as well as for preparing tree care contract specifications.

ANSI standards are divided into several parts, each focusing on a specific aspect of woody plant management.

ANSI Z133 Safety Standard

The Z133 Safety Standard was developed for the arboriculture industry under the procedures of the American National Standards Institute. The 2017 revision provides the most current criteria in the United States for arborists and other workers engaged in arboricultural operations:

- General safety
- Electrical hazards
- Use of vehicles and mobile equipment
- Portable power hand tools
- Hand tools and ladders
- Climbing
- Work procedures

This publication provides an essential guide for federal, state, and municipal authorities in drafting regulations. (©2017, softcover, ten annexes, glossary, index, 74 pp.)

Available in print or digital.

Consumer Information

Individual Consumer Information Brochures

This consumer-oriented series of brochures provides concise answers to frequently asked questions about trees and their proper care. Sized to fit inside a normal business envelope, they are ideal for mailing with newsletters, billing statements, or bid proposals. Great for municipalities and utility companies, as well as tree care businesses.

Brochures sold in packages of 100.

Purchase 3 packs or more of the same title.

Children's Books

Up in the Leaves —Shira Boss

This beautifully illustrated book tells the true story of ISA Certified Arborist Bob Redman. As a child growing up in the hustle and bustle of New York City, Bob found solace in the trees. Tired of the noise, the people, and the rushing around, he took shelter in the natural beauty of Central Park, where he covertly built a series of amazing tree houses. He started with a simple platform, but over time his hideaways grew more and more elaborate. He played cat-and-mouse with the park workers, who kept tearing down his houses, until he was finally caught. But his story ends with a happy surprise! (©2018, hardcover, 34 pp., full color illustrations)

[O2079](#)
